Cycle ovarien et des hormones ovariennes

Q1: commentez l'évolution des taux hormonaux d'oestradiol et de progestérone

Q2: quelles sont les unités d'hormones ovariennes produites ? exprimez les en grammes.

Q3: Mettez en relation le cycle ovarien et les concentrations hormonales et faites des hypothèses quand aux cellules à l'origine de l'oestradiol et de la progestérone.

Q4: montrez que cette synchronisation des cycles contribue au succès de la reproduction.

Cycle utérin
